Brief Report :-

On the occasion of World Standards Day, a webinar was organized on October 18, 2025, under the chairmanship of Er. R. P. Agrawal, Chairman, Local Centre Meerut, the Institution of Engineers (India).

Er. Ajay Maurya, Scientist 'D' / Joint Director, BIS, Chandigarh, delivered an insightful presentation in the webinar commemorating World Standards Day, celebrated globally on October 14, 2025. The theme for this year was "Shared Vision for a Better World – Spotlight on SDG 17: Partnerships for the Goals."

The theme highlights how international standards, developed through global collaboration, provide a common framework enabling stakeholders — industries, governments, and organizations — to work together effectively towards achieving the United Nations' Sustainable Development Goals (SDGs), particularly the goal focused on global partnerships.

In his presentation, Er. Maurya elaborated on the history and significance of various SDGs and explained that Goal 17 focuses on partnerships for sustainable development. He also discussed several standards developed by the Bureau of Indian Standards (BIS), with special reference to gold, silver, and other important commodities. He emphasized how standards help industries ensure the quality of their products and how international partnerships based on standards can promote the achievement of SDGs.

An interactive question-and-answer session followed, during which Er. Maurya addressed several queries from participants regarding gold and silver hallmarking processes. He also provided practical examples, such as methods to check the standard of a mobile charger.

Almost all participants received satisfactory answers to their queries.

In conclusion, Er. S. C. Mittal, Honorary Secretary, proposed a vote of thanks to Er. Maurya for his excellent presentation and to all participants for their active cooperation.
