Brief Report (not exceeding 4000 characters)

World Engineering Day for Sustainable Development was celebrated by organizing a webinar on Google Meet. Er. Rajneesh Kumar, Immediate Past Chairman presided over the meeting and welcomed the guests and members of IEI. Prof. (Dr.) K.L.A. Khan, Dean IEC and Professor, Mechanical Engineering KIET, Ghaziabad was the speaker. Dr. Khan said that Engineering innovation has played a significant role in shaping the modern world by introducing new technologies and products that have transformed various industries, including healthcare, transportation, communication, energy, and manufacturing. Examples of engineering innovations include the internet, smartphones, renewable energy sources, self-driving cars. Innovation in Engineering is crucial in solving complex problems, improving productivity, enhancing safety, and advancing human progress. It requires a commitment to continuous learning, creativity, and a

willingness to take Engineering innovation. Engineers can play a critical role in creating a more resilient world by addressing the challenges posed by natural disasters, climate change, and other environmental, social, and economic disruptions.

Er. Rajneesh Kumar was the convener of the programme. In the end Er. R.P. Agrawal, Hony. Secretary, IEI, Meerut Local Centre presented vote of thanks.
